WORK EXPERIENCE

DevOps Engineer

January 2026 – Present

Tata Consultancy Services (Client: Deutsche Bank)

Bengaluru

- Architected and provisioned secure, highly available cloud infrastructure for financial services applications using **Terraform** and **AWS Services**, ensuring compliance with strict banking regulatory standards.
- Orchestrated **CI/CD pipelines** using **Jenkins** and **GitLab** for Python applications, reducing deployment times and enabling zero-downtime releases for critical banking platforms.
- Managed containerized environments using **Docker** and **Kubernetes**, optimizing resource allocation and auto-scaling for high-volume transactional workloads.
- Implemented robust observability and monitoring solutions utilizing **CloudWatch** and log aggregation tools to proactively detect and resolve incidents, minimizing MTTR for core banking systems.
- Enforced strict **DevSecOps** practices by integrating vulnerability scanning, automated compliance checks, and secure secrets management into the deployment lifecycle to protect sensitive financial data.

AWS Data Engineer

May 2025 – January 2026

Tata Consultancy Services (Client: Deutsche Bank)

Bengaluru

- Optimized **AWS Glue ETL scripts** using **PySpark** to load data from **Amazon S3** to **MySQL**, ensuring high performance and data integrity.
- Designed and managed **MySQL database objects** such as tables, views, and indexes to support business reporting needs.
- Performed advanced data transformations and validations in **Glue** to deliver clean, analytics-ready datasets.
- The data pipelines were automatically and standardized using **AWS Glue Workflows** and **Amazon EventBridge** to make them run **event-driven**, with errors nevertheless handled.
- The ETL workflows were tested, debugged and permanently maintained through collaboration with **cross-functional teams** to ensure that scaling and reliability were guaranteed.

Data Engineer & Analytics Specialist

April 2025 – December 2025

Tata Consultancy Services (Client: Quest Diagnostics)

Bengaluru

- Completed a knowledge transition for the Eli Lilly **GCP migration** and analytics project while having hands-on experience with important tools like **BigQuery**, **Cloud Storage**, and **Dataflow** within the **Google Application Modernization** framework.
- Helped to design and test small-scale data pipelines with the use of **Python** and **SQL**, incorporating it to ingestion and transformation steps to reach modernization goals.
- Consulted with senior team members to learn and adhere to **GCP-based workflows**, operating as part of the initial tasks related to **data validation**, table creation in BigQuery, and general cloud activities.

Engineer (Cloud Infrastructure)

June 2023 – June 2024

Virtusa (Client: Petco)

Hyderabad

- Our team utilized **Terraform** along with **AWS Services** to generate and operate AWS infrastructure through multiple tools.
- Created infrastructure using **AWS AMI's** and **EC2** while working with **RDS** and **S3** through **EBS** together with **CloudWatch**, **CloudFormation**, and **Network Routing**.
- Project migrations targeted by me included complete **design and implementation** work.
- Integrated **Git** for version control and collaboration.
- The analysis of project application architecture through conducted research helped the team solve **architectural problems**.
- I worked together with team members to create solutions which we tested after compilation through our collaborative efforts.

Engineer Technology
Virtusa (Client: CITI Group Inc.)

Nov 2022 – June 2023
Hyderabad

- Maintained continuous communication channels with IT managers and client stakeholders to deliver solutions requirements instantly while **escalating problems promptly** when needed to fulfill project targets.
- Provided **Production Support** in terms of **incident management**: I resolve technical issues by reporting incidents through early escalations to build solutions alongside client support in a quick troubleshooting process.
- The team guarantees compliance with **regulatory needs** and **security requirements**.
- I possess experience working with **SQL queries** through both **Oracle** and **Microsoft SQL** databases.
- My contributions included work on **CVMPS** and **EOVS**.

Associate Engineer
Virtusa (Client: CITI Group Inc.)

May 2021 – Oct 2022
Hyderabad

- Maintained both proficient knowledge of **system development methodologies** along with system analysis principles which can be applied to business solutions.
- Alongside client representation and IT direction I work towards **efficient communications** for solution development needs and project progress alongside issue escalation.
- Provide **Production Support** in terms of incident management: Usage support includes both pre/post-implementation evaluations along with **incident monitoring** and speedy problem diagnosis.
- Experience with **SQL database query functions** including Oracle and Microsoft SQL.
- CVMPS and EOVS projects were part of my experience.

Co-Founder & Test Engineer
Trigid Innovations Pvt. Ltd.

Nov 2018 – Sept 2020
Incubation Centre

- One of the co-founders of a **3D printing startup** with a vision and direction and driving innovation in the technology of creating and using (additive) materials.
- The design and implementation of several 3D printing projects were managed by me, and I used **CAD software** to produce **prototypes** and improve the product design.
- The 3D printing methods were **optimized and improved** after the analysis cycle.
- The most appropriate materials and techniques were selected to the effect that efficiency, product quality as well as **production scalability**.

EDUCATION

Aditya College of Engineering & Technology
B.Tech in Electronics and Communication Engineering

Surampalem, AP
GPA: 7.02

SKILLS & CERTIFICATIONS

- **Cloud & DevOps**: AWS (Glue, Lambda, S3, EC2, CloudWatch), Azure (Basics), Terraform, Docker, Jenkins, GitLab, GitHub.
- **Data & Database**: SQL, Python (Pandas, NumPy), PySpark, BigQuery, MySQL, Oracle, Microsoft SQL.
- **Languages**: Python, C#, .NET, C, HTML, CSS, JavaScript.
- **Certifications**: AWS Certified Data Engineer Associate, AWS Certified Solutions Architect – Associate, Microsoft Azure Fundamentals HC Terraform Associate, CCNA CyberOps Associate, Microsoft Python Fundamentals.

EXTRA-CURRICULAR ACHIEVEMENTS & PROJECTS

- **Project - Automatic Waste Segregation (IoT)**: Developed a smart waste management system using **Arduino** and **sensors** to automatically segregate dry/wet waste and monitor bin levels via mobile app.
- **Project - React Portfolio**: Built a responsive portfolio using **React JS**, **Tailwind CSS**, and **Framer Motion** for interactive animations.
- **Project - Vulnerability Assessment**: Identified vulnerabilities in 200+ web/android applications using **Google Dorks** and **SQL strings**.
- **Published Author**: "Intelligent Squander Isolation Method" in *International Research Journal of Modernization in Engineering & Science*.
- **Award Winner**: Secured **1st Prize** at Project Expo-2020 (**IETE**) and **2nd Prize** for project presentation at VEDA2k19.
- **Recognition**: Recognized as "**Cybersecurity Ambassador**" (Q23-24) and "**Privacy Champion**" (2024) at Virtusa.
